ADAPTER FOR IMMERSION PIPES

Adapter for immersion pipes

Using our adapter for immersion pipes, a thermometer or other measuring body can be installed on pressurised pipes. The system does not need to be shut down and pipe work is simplified. The immersion adapter is mounted on a Type S1 clamp and then a thermometer or other body can be inserted into the pipe.

The adapter is suitable for 8.5 and 10 mm diameter immersion pipes. Two alternative seals are supplied for sealing during the mounting procedure. A permanent seal is achieved when the adapter is tightened to the immersion pipe.

Technical data

- Dimensions, S1 clamp: DN 20 (3/4") – DN 100 (4")
- Length of immersion pipe: 63 mm for type S1, DN 20 (3/4") – DN 100 (4")
100 mm for type S1, DN65 (2") – DN 100 (4")
- Thread of immersion pipe: Female, DN 15 (1/2")

Other technical specifications are the same as for type S1 T-pipe connection.
